

WE ARE

HIRING!

Our team is growing, and we are looking for a:

CYBERSECURITY PRODUCT MANAGER

-  Must be a graduate of Bachelor's in Information Technology, Computer Science, Computer Engineering, or equivalent, with at least 5 years of relevant job experience in the related field; higher educational attainment (graduate studies) is preferred
-  Licenses and certifications in Cybersecurity such as Certified Information Systems Security Professional (CISSP), Certified Information Security Manager (CSM), Certified Ethical Hacker (CEH), CompTIA Security+, Certified Information Systems Auditor (CISA) will be a great advantage
-  Proficient in Cybersecurity standards and regulations such as the NIST Framework, Information Security Certification ISO / IEC 27001, Data Protection and Privacy regulation like GDPR, HIPAA, SOX, PCI-DSS and others
-  Has a proven track record of at least 10 years in product management roles within the cybersecurity industry, demonstrating progressive responsibility and leadership as well as the ability to work with cross-functional teams in an agile environment
-  Demonstrates strong technical background with effective hands-on experience in cybersecurity technologies, including but not limited to firewalls, intrusion, detection, and prevention systems, encryption, endpoint security, identity and access management (IAM), and security information and event management (SIEM) solutions
-  Exhibits strong business acumen, including the ability to analyze market dynamics and trends as well as to understand customer needs, and to make effective data-driven decisions
-  Highly functional and motivated, and with excellent command of written and spoken English to effectively present data and concepts and communicate information (especially highly technical details)
-  Must be willing to work in Bonifacio Global City, Taguig City
